

cm Inch

**Correct sizing is integral to proper protection and comfort**

DuPont also recognizes the importance of having the correct size clothing. Accordingly, DuPont Personal Protection garments are available in a variety of sizes.

The sizing diagram indicates the body measurements and correlation to the DuPont sizes. The size definitions are based on body measurements taken wearing a layer of underwear and without shoes.

When selecting a garment, the size should always be chosen based on the wearer's measurements and on a wear trial, not on normal clothing sizes.

Les "6 types" de protection		
<p>Catégorie III</p>  <p>Les vêtements de protection chimique sont conformes aux normes européennes</p>		<p>Type 1 : Etanche au gaz*</p> <p>EN 943-1 EN 943-2</p>
		<p>Type 2 : Non étanche au gaz*</p> <p>EN 943-1</p>
		<p>Type 3 : Protection contre les liquides chimiques pressurisés*</p> <p>EN 14605</p>
		<p>Type 4 : Protection contre les aérosols liquides*</p> <p>EN 14605</p>
		<p>Type 5 : Protection contre les particules chimiques solides en suspension dans l'air*</p> <p>EN ISO 13982-1</p>
		<p>Type 6 : Protection limitée contre les pulvérisations liquides*</p> <p>EN 13034</p>
